TransPac®

Biological & Organic Waste Bags

The TransPac® Zipper Liner is a cleaner, more convenient way of managing large volume biological and organic waste streams and the associated odor, leakage, disease and environmental contamination issues.

It is constructed using a proprietary, thermally bonded layering of polypropylene-based material and an industrial grade zippered sealing system to secure contents.

It fits securely inside industrial roll-off containers, trailers or truck racks from 10 to 40 cubic yards in total volume and is easy to install, contains large, heavy loads and slips right out at disposal.

Applications:

- ▶ Animal Carcasses
- ▶ Meat Processing Residue
- ▶ Bird Droppings
- ▶ Contaminated Manure
- ▶ Animal Litter & Bedding
- ▶ Spoiled Feed Material
- ▶ Contaminated Compost
- ▶ Bio-Sludges

Features:

- ▶ Contact barrier to minimize human exposure, container cleaning, vermin, bugs and disease vectors
- ▶ Liquid resistant, flexible construction
- ▶ Light material containment during transportation
- ▶ Strong, puncture-resistant material
- ▶ Breathable zipper to minimize potential vapor expansion
- ▶ Odor barrier
- ▶ Opaque, visual barrier
- ▶ Natural heat retention to jump-start the composting process

**Exceeding Expectations,
