We manufacture packaging. We engineer solutions.

PacTec, Inc. is the leader in designing and manufacturing flexible packaging for hazardous and nuclear wastes across the globe. Enclosed you will find details on our complete line of waste containment and packaging solutions.

Our corporate offices are based in Clinton, LA with sales and distribution locations worldwide. We also own and operate manufacturing facilities in Clinton, LA and Subic Bay, Philippines.

With over 20 current US and one British patent, we have a reputation for developing innovative solutions for today's problems.

Quick Facts:

- ▶ 20+ US and One British Patent
- ▶ ISO 9001: 2015 Certified
- ▶ 6 US Distribution Facilities
- ▶ 3 Manufacturing Plants
- ▶ Worldwide Sales Locations

In House Capabilities:

- ▶ Engineering
- ▶ Research & Development
- ▶ Quality Control
- ▶ Product Testing
- ▶ Customer Service

PacTec Contacts

BermPac®

Portable Spill Berms

PacTec offers several portable spill containment solutions called BermPacs®. They provide a safe, easy, and cost-effective solution for spill containment aimed at helping you prevent costly incidents. While our most common sizes range from 4' to 50', PacTec, Inc. can manufacture any custom size needed. BermPacs® are offered in various materials that are UV and chemical resistant, flexible, portable, lightweight, and durable. They are also perfect secondary containment solutions.

Types of BermPacs® Available:

- ▶ Hurdle Bracket
- ▶ Pop-Up Foam
- ▶ Sidewall
- ▶ Collapsible
- ▶ Hinge Bracket
- ▶ Half Pipe
- ▶ Custom Berms
 - Wellhead
 - Railroad
 - Floating

Features:

- ▶ Many material choices
- ▶ Various wall configurations
- ▶ Custom sizes available
- ▶ Company logo available

Applications:

- ▶ Frac Tanks
- ▶ Tanker Trucks
- ▶ Decon Wash Pads
- ▶ Pumps & Generators

Advantages:

- ▶ Prompt manufacturing lead time
- ▶ Portable, reusable, repairable, and cost-efficient
- ▶ Durable and lightweight
- ▶ Easy to set up, deploy, move, and disassemble

Wire Bracket

Removeable Wire Bracket BermPac®

Our Wire Bracket BermPac® is manufactured with sidewalls that are easily set up with lightweight galvanized steel wire brackets. These patent-pending* brackets are designed to pinch and slide into the berm's sidewall pockets to keep them securely in place, unlike the outdated traditional L-bracket. This cost-efficient spill containment option is made from a variety of chemical and acid-resistant materials that provide unrivaled spill containment. We also have many commonly used sizes available for quick delivery.

Features:

- ▶ Many material choices
- ▶ Wire stays in pocket
- ▶ Innovative patent-pending* bracket
- ▶ Company logo can be added

Advantages:

- ▶ Prompt manufacturing lead time
- ▶ Portable, reusable, and repairable
- ▶ Durable and lightweight
- ▶ Easy to set up and deploy

Hurdle Bracket

Rigid sidewall BermPac® solution

The Hurdle Bracket BermPac® is manufactured with lightweight aluminum hurdle brackets, which enable a continuous rigid sidewall, effectively eliminating the need for hose bridges. The removable brackets also provide for easy drive-on and drive-off.

Features:

- ▶ Made from a variety of UV, chemical, and acid-resistant materials
- ▶ Rigid sidewall eliminates need for hose bridges
- ▶ Many standard and custom sizes available
- ▶ Company logo can be added

Advantages:

- ▶ Appropriate for cost-conscious consumers
- ▶ Larger aluminum hurdle brackets create sturdy walls
- ▶ Easy to set up, maintain, and dismantle
- ▶ Very common and widely used in many industries

Hinge Bracket

Easy to Use Hinge Bracket BermPac®

When it comes to ease of use in spill containment, look no further than PacTec's Hinge Bracket BermPac®. The integrated hinge brackets quickly snap into the upright position to provide ultimate spill protection without presenting a trip hazard. The brackets can also be easily removed and replaced if damaged in the field. Manufactured from a variety of chemical and acid-resistant materials, they also fold to a compact size for transport to the job site. We also keep many commonly used sizes in inventory for quick delivery to you.

Features:

- ▶ Custom hinge locks when in upright position
- ▶ Brackets can be removed/replaced
- ▶ Many material choices available
- ▶ Company logo can be added

Advantages:

- ▶ Prompt manufacturing lead time
- ▶ Portable, reusable, and repairable
- ▶ Durable and lightweight
- ▶ Easy to set up and deploy

Pop-Up

BermPac® with pop-up internal brackets

The Pop-Up BermPac® is engineered as a single unit, where the interior folding brackets are permanently attached so they cannot be lost or stolen. The sidewalls are easily raised and lowered as an alternative to bracketed solutions, allowing for easy drive-on/drive off.

Features:

- ▶ Made from a variety of UV, chemical, and acid-resistant materials
- ▶ Many standard and custom sizes available
- ▶ Company logo added
- ▶ Several complimentary accessories available

Advantages:

- ▶ Incredible time saver
- ▶ Exceptional durability
- ▶ Easy to set up, maintain, and dismantle
- ▶ Single piece construction

Foam

BermPac® solution with foam sidewalls

This BermPac® utilizes soft or hard foam for sidewalls that is both economical and lightweight. The options include sealed foam sidewalls or removable foam sleeves depending on your job site needs. Not only do these BermPacs® offer easy and quick installation, but replacement foam inserts are also available if needed.

Features:

- ▶ Made from a variety of UV, chemical, and acid resistant materials
- ▶ Drive-on/drive-off without exiting the vehicle
- ▶ Lightweight and durable
- ▶ Easily replaceable foam inserts

Advantages:

- ▶ Very cost-efficient and appropriate for low budgets
- ▶ Sleeved foam pieces protect your investment
- ▶ Very quick installation
- ▶ Easy to set up, maintain, and dismantle

Collapsible

The compact, portable BermPac® solution

This compact, portable and collapsible BermPac® is small enough to fit behind the seat of your vehicle when rolled and strapped. They set up in seconds, and are available in multiple sizes. Also, they are made of a lightweight, durable, and chemical-resistant 18 oz. vinyl.

Features:

- ▶ Instant set-up
- ▶ Made from quality 18 oz. vinyl
- ▶ Multiple sizes available
- ▶ Ideal for most drips and spills

Advantages:

- ▶ Compact & portable
- ▶ Collapsible and stores easily in small spaces
- ▶ Cost-effective
- ▶ Small footprint with large capacity

Accessories

Optional Add-Ons

PacTec provides a full line of accessories for the BermPac® to ensure that your spill berm has the longest possible life and provides you with the greatest return on investment.

Dewatering

Liners and Filters

Our disposable dewatering liners are the cost-effective way to efficiently separate liquids from solids in your existing dewatering containers & boxes for faster recovery and disposal. Fabric geotextile and screen mesh filter options are available to achieve desired flow rates and micron levels.

Applications:

- ▶ Industrial sludge pits
- ▶ Cooling tower sludge
- ▶ Paint sludge
- ▶ Sump cleaning

Features:

- ▶ Easy to install and use
- ▶ Affordable & disposable
- ▶ Mesh options for faster dewatering
- ▶ Cloth options available for heavy metals and hydrocarbons

Advantages:

- ▶ Works with most industrial dewatering box sizes & designs
- ▶ Reduces disposal volume
- ▶ No volume increases associated with using solidification agents

GeoPac®

Dewatering Tubes, Filters and Bags

The GeoPac® is a geotextile tube used for dewatering and volume reduction of various types of sludge material. The GeoPac® uses internal pressure to dewater instead of relying solely on gravity. This allows you to process large volumes of sludge more efficiently than typical dewatering boxes, saving you time and money.

Applications: Features:

- ▶ Agricultural waste dredging
- ▶ Industrial pond dredging
- ▶ Marine/beach restoration
- ▶ Municipal sewerage plants
- ▶ Multiple fill ports
- ▶ Built for all volume applications
- ▶ Dimensionally stable fabric to minimize blinding
- ▶ High tenacity thread for seam strength

Advantages:

- ▶ Eliminates box rentals
- ▶ Stackable for space utilization
- ▶ More efficient than typical dewatering boxes
- ▶ Volume & weight reduction of sludge lowers disposal costs

PacTec's LiftPac® is the only self-standing zipper-top hazardous waste bag on the market. This cubic yard bag is the perfect solution for the disposal of household hazardous waste, contaminated PPE, and a variety of other applications. The LiftPac® walls are constructed of rigid corrugated fiberboard allowing the bag to be self-standing, while the glued-in 6 mil PE liner provides ultimate leak protection. It contains the equivalent of four 55-gallon drums at a significant savings in cost and storage space. They are lightweight, easy to assemble, versatile, and can easily be lifted by forklift with attached loops.

Applications:

- ▶ Household Hazardous Waste
- ▶ Lab Packing
- ▶ Contaminated PPE
- ▶ Asbestos & other dusts
- ▶ Wastewater treatment sludges

Features:

- ▶ UN-Rated "X" for Packaging Groups I, II and III
- ▶ Cardboard sidewalls hold bag open for easy filling
- ▶ Proprietary zipper closure
- ▶ UV Coated, weather resistant outer layer

Advantages:

- ▶ Self-contained multi-layer unit
- ▶ Superior to stapling boxes to pallets
- ▶ Lightweight and compact
- ▶ Lowers disposal costs as compared to 55-gallon drums
- ▶ Collapsible for easy storage

TransPac®

Specialized Industrial Container Waste Bags

The TransPac® limits worker exposure, offers quick and easy installation, reduces clean-out costs, and requires minimal storage space. Customized options include multiple spouts, open-top, open-end, and our proprietary zipper closure. The standard TransPac® is constructed of woven polymeric fabric and can be designed to handle asbestos, high-heat materials, powders, and odorous materials.

Applications:

- ▶ Asbestos and other powders
- ▶ Odorous Materials
- ▶ High Heat Applications
- ▶ Metal Shavings and Sludges

Features:

- ▶ Proprietary zipper closure makes installation quick and easy
- ▶ Prevents discharge of airborne dust
- ▶ May be lined for wet applications
- ▶ Spouted TransPac® can be loaded by vacuum or gravity feed systems

Advantages:

- ▶ Labor and cost savings over smaller waste packaging
- ▶ Easy Installation
- ▶ Storage savings
- ▶ Increased loading speed
- ▶ Helps in odor reduction

Configurations:

We offer several proprietary designs to best meet your project guidelines.

TransCover®

Tarps and Accessories

The TransCover® is a custom-manufactured tarp utilizing quality, high strength yet lightweight fabrics. Many standard sizes are stocked to provide a quick turnaround. From waterproof to mesh, to a full line of bungee accessories, PacTec has your tarp needs covered.

Applications:

- Layflat/Throw tarps
- Auto tarp replacements
- Rollover tarps
- Mesh packer/Compactor tarps

Features:

- Strong, lightweight fabrics
- Ratchet binders available
- Heavy-duty brass spur grommets or D-rings
- Webbing reinforced perimeter hems

Advantages:

- Prompt manufacturing time
- Durable and lightweight
- Enhances container life

Accessories Available:

- Rise bows
- Roll pipe
- Fixed pipe
- Tarp handles
- Tarp straps
- Tarp stops
- Ratchet binders
- Bungees

TransLiner®

Disposable Container Liners

The TransLiner® is a disposable polyethylene container liner with a patented design that ensures a form fit every time. Our design positions the liner seals outside of the container, providing exceptional leak protection to safely and securely transport solids and sludge wastes. The TransLiner® may also be fitted to cover the load which aids in dust and odor control.

Applications: Advantages:

- | | |
|-----------------------|---------------------------|
| ▶ Roll-off Containers | ▶ Easy installation |
| ▶ End Dump Trailers | ▶ Reduced washout costs |
| ▶ Luger Boxes | ▶ Odor and freeze control |
| ▶ Rail Gondolas | ▶ Extended container life |

Features:

- ▶ Seals outside the container for leak protection
- ▶ Available in many standard sizes and different mil thicknesses
- ▶ Patented, form-fit design
